

PACKAGING MACHINERY SERVICES

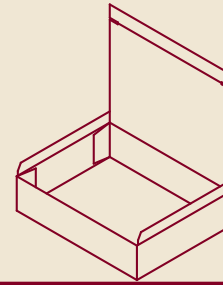

TUCK FLAP CLOSER™

THE TFC-100:

The Tuck Flap Closer™ is a fully automatic solution that is capable of full integration within your line. It is built to withstand heavy duty environments. It can be integrated within your current line or we can develop a customized solution that will form, erect and close your packages. The TFC-100 will randomly receive, time and tuck carton flaps at speeds of 90 cardons per minute. It will close the flaps on various carton sizes and self-locking trays suitable for the food packaging, automotive and cosmetic industries. Switchback Group has customized ideal solutions for over 35 years and was formerly known as Packaging Machinery Services Company. Like all of the Switchback Group equipment line, it is known for its reliability and dependability, and supported by Switchback Group's team of engineers and service professionals. Our experience gives us the ability to customize unique solutions that are semi- or fully-automated and that can be incorporated and fully integrated.

CARTON SPECIFICATIONS

LENGTH		WIDTH		DEPTH	
Min	Max	Min	Max	Min	Max
5.5	13	3.75	8.0	1	3

KEY FEATURES

- ◇ Easy integration within line
- ◇ Flag infeed control
- ◇ Positive lug chain control
- ◇ Open architecture
- ◇ Variable speed control
- ◇ Quick size changes
- ◇ Safety interlocks
- ◇ Built in jog with programmable ramp speeds
- ◇ 230 VAC, 3 phase
- ◇ Detent overload clutch with electrical interlock
- ◇ Customized to each specific line
- ◇ Lock out / tag out compliant

OPTIONS

- ◇ Washdown construction
- ◇ Deboss Coder
- ◇ 460 and 600 VAC
